This is a non-final office action for application number 10/687,453, Apparatus for Securing a Cap of a Container to an External Structure, filed on October 15, 2003.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the primary reasons for the allowance of the claims in this application are the limitations of an apparatus for securing a cap of a container to an external structure when the cap is removed from the container, the apparatus having retaining structure including an eyelet sized to receive a fastener that can be secured within the interior of the cap, a coil configured to engage the interior of the cap, wherein outward spring tension from the coil presses the coil against the interior of the cap and retains the coil in the cap, and securing structure connected to the retaining structure that releasably secures the cap to an external structure when the retaining structure is installed inside the cap and the cap is removed from the container, now included in independent claim 11 and in combination with the other elements recited in the claim; and in combination, a cap and hanger apparatus having a cap configured to removably cover an opening in a container, a hanger having a coil sized to fit within the cap, wherein the coil is configured to exert an outward spring tension against the interior of the cap when the coil is installed inside the cap, a body connected to the coil, a hook connected to the body, included in independent claim 21 and in combination with the other elements recited in the claim. These combinations of respective elements are not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
